COMMODORE
AYLIK BİLGİSAYAR DERGİSİ

Commodore'un Ücretsiz Ekidir

MDE ve BDE

Bu sayıdan itibaren her ay Makine Dili Editörü (MDE) ve Basic Dili Editörü (BDE) programlarını Döküm Eki'mizde bulabilirsiniz. Bu programlar dergimizde yayınlanan programları hatasız yazabilmek için hazırlanmıştır.

Bu programı yazıp, data satırlarında hata yoksa çalıştırdığınız zaman kayıtlı MDE adlı bir programımız olacak. Artık bu programı yükleyip kullanarak dergide yayınlanan makine dili programlarını hatasız olarak yazabileceksiniz.

Programı yükleyip çalıştırdıktan sonra size çeşitli sorular sorulacak. Bunlardan ilki yazacağınız programın adı. Bundan sonra programın başlangıç adresini girmeniz gerekecek. Bu adres dergideki dökümde program adından sonra gelen ilk sayıdan biri olacaktır. Bu sayılar 16'lık düzende oldukları için içlerinde harf de içereceklerdir, şaşırmayın. Sonraki soru yine aynı şekilde girmeniz gereken programın bitiş adresidir. Bu da programın adının yazılı olduğu satırdaki ikinci sayıdır.

Bundan sonra giriş ekranına girilecektir. Artık tek yapmanız gereken dergideki sayıları olduğu gibi yazmak olacak. Bilgisayar sizin girdiğiniz ilk sekiz çift sayıyı dokuzuncu kontrol çiftiyle karşılaştırdıktan sonra yapılan giriş doğruysa ince bir ses verecektir. Eğer herhangi bir yerde hata yapmışsanız bu ses daha kalın ve sinir bozucu olacaktır.

Programın son satırını da yazdıktan sonra MDE size programın nereye kaydedileceğini soracaktır. Teyp için T, disk için D tuşuna basmanız yeterlidir. Kayıt işleminden sonra RUN/STOP RESTORE tuşları ile programdan çıkıp yeni yazdığınız programı çalıştırabilirsiniz.

MDE'nin değişik özellikleri de vardır. Bunlara bir gözatalım:

CTRL-S: Bu tuşlara birlikte basarak programın ortalarındayken kayıt edebilirsiniz. Böylece mümkün bir enerji kesintisinde programınız zarar görmez. Bunu sık sık yapmanızı öneriyoruz.

CTRL-L: PRogramı CTRL-S ile kaydettikten sonra bilgisayarı kapatabilirsiniz. CTRL-L tuşları ile de programı tekrar yükleyip kaldığınız yerden yazmaya devam edebilirsiniz.

CTRL-M: Bir kısmı yazılmış olan programa devam etmek için programı en baştan itibaren incelemeniz gerekir. Boşluk tuşuna basarak programın listesini inceleyin. Sizin yazıyı bıraktığınız satır, toplam sayı hariç AA ile dolu olacaktır. Bu satır numarasını öğrendikten sonra RUN/STOP tuşu ile ana menüye gelin.

CTRL-N: Ana menüye geldikten sonra bu tuş ile yazmaya devam edeceğiniz satır numarasını girin ve dergiden program yazmaya devam edin.

CTRL-P: Bu emirle de elinizdeki herhangi bir dökümanı yazıcıya bastırabilirsiniz.

BDE

Bu programı yazmak için MDE'yi kullanmanız gerekir. Kaydedilen programı diskten veya kasetten yükleyip dergideki BASIC programları yazmak için kullanacaksınız.

Dergide dökümler içinde altı çizili olan harfler SHIFT'le, üstü çizili olan harfler de COMMODORE tuşuyla basıldığında ortaya çıkar. Siz bunları yapınca altı çizili bir harf değil esas istenen grafik karakteri görünecektir.

Siz satırı yazdıktan sonra ekranın sol üst köşesinde beliren sayı dergidekiyle uyuşuyorsa satırı doğru yazmışsınız demektir. Aksi taktirde bir hata vardır.

Dergideki listede görünecek olan başka karakterler de vardır. Bunlar sizin yazmanızı kolaylaştırmak için hazırlanmıştır:

CLR - Klavyenin sağ üstündeki ikinci tuş. Kursoru ekranın sol üst köşesine taşır.

HOME - CLR tuşuna SHIFT ile basıldığında ekranı temizler.

RVSON - CTRL ve 9 tuşlarına beraber basarak negatif yazıma geçer.

RVSOFF - CTRL ve 0 tuşlarına beraber basarak pozitif yazıma geçer.

DOWN - Kursor aşağı tuşu.

UP - Kursor yukarı tuşu.

RIGHT - Kursor sağa tuşu.

LEFT - Kursor sola tuşu.

SPACE - Boşluk tuşu.

Bunların dışında CTRL ve COMMODORE tuşları kombinasyonları da vardır. Eğer işaretleri arasında yukarıda saydığımız kelimelerden birinden önce bir sayı varsa, o tuşa o sayıda basılacak demektir.

Pikchachanja

Hakan Ulugerçek

Basit bir animasyon programı olan Pikchachanja'da (kısaca Pik) çizilen iki şekil arasında bir geçiş sağlanır. AMIGA'da DeluxePaint4 ile gerçekleştirilen bu tür efektlerden daha verimli olan Pik'le ana menüde şu özellikler bulunmaktadır:

1. Resim çizimi: Burada ekranın üst kısmında Q, Z, O ve P harfleriyle kontrol edilen nokta grafiğin köşelerini belirtir. F1 tuşu ile yeni bir nokta tanımlamak ve F3 ile bir önceki noktadan yeni noktaya çizgi çekmek mümkündür. Bu arada çizgi adımını artırmak için yukarı ok, azaltmak için * karakterleri kullanılabilir. Resim bittiği zaman İngiliz Pound'u (£) işaretiyle ikinci şeklin çizimine geçilir. İkinci resim de bittikten sonra yine Pound (£) işaretiyle animasyonun hazırlanmasına geçilir.

2. Resim kaydetme: Vereceğiniz isimle bir animasyon kaydedilir.

3. Resim yükleme: Vereceğiniz isimdeki dosya yüklenir.

4. Animasyon izleme: Hazırlanan animasyonu izleme.

Commodore

Türk Paint

Hakan Arıbaş

Commodore 64'ün grafik yetenekleri (özellikleri) oldukça iyi olmasına rağmen bu özellikleri kullanacak komutlara sahip değil. Ancak "POKE" ve "PEEK" komutları arasında boğularak kullanılabilen bu özelliklere TURK PAINT ile sadece birer SYS komutu kullanarak ulaşabilirsiniz. TURK PAINT, Commodore 64'ün 320×200 çözünürlüklü grafik modu için küçük çapta bir grafik paket programıdır. Commodore 64'e beş yeni komut kazandırır. Bu komutlar:

ENTER: HI-RES (yüksek çözünürlük) moduna girme:

PAINT: Ekranı istenilen renkle boyama (ENTER'dan sonra kullanılmalı, önce değil)

POINT: Ekranın istenilen koordinatına nokta koyma (parametresi 1) veya istenilen bir koordinattaki noktayı silme (parametresi 0)

CLEAR: Grafik ekranını temizleme veya değişik lineer desenlerle doldurma (ekranı temizlemek için parametre 0)

EXIT: HI-RES grafik modundan çıkma.

Programı çalıştırdığınızda bu komutların kullanım formatları ve parametre limitleri hakkındaki bilgiler ekranda gösterildiğinde burada saymaya gerek duymuyorum. (Örneğin POINT komutu için SYS49152, A, X, Y. A nokta koyma (1) veya nokta silme (0), X, Y ekranı koordinatları gibi...). Tüm C-64'çülere bol grafikli günler.

Türk Paint Demo programı kullanılarak yazılan bu demo, iki boyutlu bir ekrana üç boyutlu bir grafik çizmeye başlar (bu grafik, rüzgarda dalgalanan bir mendile benziyor). Grafiğin temeli matematiksel fonksiyonlara dayandığından, programın başındaki fonksiyonu değiştirerek görüntüler elde edebilirsiniz.

New Tetris

Phobia

Bir tür Tetris olan bu oyunda toplamları 9'a tamamlayacak şekilde rakamları üstüste getirmeniz gerekiyor. Örneğin 4 ve 5 veya 9 ve 0 üstüste gelince ikisi de yok olacaktır. rakamları sağa sola oynatmak için kursor tuşlarını kullanmanız gerekiyor.

Kursor sağ/sol - Sağ.
Kursor yukarı/aşağı - Sol.

Özür

75. sayıdaki Solarpix adlı programın
60. satırda PP = 2 × π (P1)
290. satırda M = N × 2 × π (P1)/256
1420. satırda J = INT (A/π)
düzeltmeleri yapılmalıdır.

COMMMODRE 64 İLE PROGRAM YAZIYOR MUSUNUZ?
PROGRAM DÖKÜM EKİNDE YAYINLANMAYA HAK KAZANAN HER PROGRAMINIZA 30.000 TL. VERİYORUZ.

Yapmanız gereken, programlarınızı bir diskete kaydedip programınızın tam açıklaması ile adresimize yollamak.

Lütfen programlarınızı en ince detayına kadar anlatın ve gerekli birimleri de yazın (disk sürücü, joystick, dataset, v.s.). Programları SIMONS' BASIC ile yazdıysanız açıklamalarda belirtin. Ve tabii adınız, soyadınız, açık adresiniz ve posta kod numaranızı da yazın.

Programlarınızı bekliyoruz.

Adresimiz: **Commodore Dergisi**
Sakız Sok. Berkel Ap.
6/2 81300 KADIKÖY
İSTANBUL

PROGRAM ABONELİĞİ

EĞER Commodore Dergisi Program Döküm eki'nde yayınlanan programları her ay düzenli olarak bir diskette elde etmek istiyorsanız, programları yazmanın derdinden kurtulup düzenli bir arşive sahip olmak istiyorsanız, yıllık program aboneliğimizden yararlanın.

Bir yıl boyunca her ay düzenli olarak Döküm Eki'nde yayınlanan tüm programları içeren bir disket alacaksınız. Eğer ilgileniyorsanız gerekli şartlar için
(9-1) 346 86 48
no'lu telefondan Commodore Dergisi'ni arayın ve en kısa zamanda aboneliğiniz başlasın.
